TERPINOLENE .17%

OCIMENE .15%

SUNMED LABS HAS GIVEN US ANOTHER DELICIOUS LIVE RESIN DAB TO GUSH OVER.

The 2090 strain is one of the genetic lines to come from the Cookies brand that SunMed has captured in a delicate and luscious live resin batter. The creamy and golden-white texture is exactly what you want to see when you are hunting for mouth-watering dabs. With a healthy 7.69% total terpenes, this 2090 is as flavorful as it is gorgeous to look at.

At the top of the profile we have a pretty close split between limonene and myrcene, followed by caryophyllene and pinene. This is interesting because it creates a relatively even balance of sativa and indica terpenes (balancing out into what we consider a hybrid headspace), while certainly leaning towards the heavier side – but without the couchlock that many of us try to avoid while being productive. The fact that my whole body relaxes at every inhale, and yet I can continue to go about my chores, is an invaluable quality in my Cannabis medicine.

The aroma is a perfect example of a quintessential hybrid: floral and fruity, with a touch of fuel and earth.

I did not detect any sweet notes, but the smell was delicious in a way that I couldn't quite put my finger on ... alluring and succulent, and something I will be going back for seconds for. SunMed Labs' iteration of Cookies 2090 live resin batter is medicine Maryland can rely on – providing their patients with tasty, targeted and sustainable relief in the modern age. 🌿
