SUNMED 2.0: FOR THE CANNABIS CONNOISSEUR

Sun. Science. Smooth.

THE SUNMED FAMILY: FROM OUR GREENHOUSE TO YOUR HOME

Setting the standard for potency and flavor in medical cannabis with state-of-the-art, Dutch-style greenhouse cultivation.

Our greenhouses allow us to cultivate clean medicine packed with rich terpenes and complex flavor profiles found only in sun-grown cannabis.

Equipped with the most advanced technology – and the most committed team in the industry, our flowers receive optimal natural light transmission and some old-fashioned TLC to craft the best medicine under the sun – literally. Our facilities allow for precise control of the natural elements while reducing the environmental impacts associated with indoor cultivation.

**SUNMED
GROWERS**
Medicine from the Sun

Full spectrum sunlight, hand-crafted soil

Unique from most, our homemade growing media is created in-house from a proprietary coconut coir blend to ensure the healthy growth of our plants. This light and airy base facilitates the free movement of water and moisture throughout the soil, allowing our plants to breathe properly. Our proprietary basket pots keep our plant roots healthy and allow for continued nourishment as they grow under full-spectrum, natural sunlight.

INTRODUCING SUNMED LABS

All the potency and flavor of SunMed's sun-grown medical cannabis, now available in concentrate and infused products.

The launch of SunMed Labs marks a turning point for our SunMed family. SunMed Growers is known for its world-class cultivation facility and now we've expanded into a state-of-the-art extraction facility as well.

Our promise to our Maryland patients is to build on the scale of our success with high-quality, highly affordable concentrates and infused products that will be available to dispensaries across the state.

The team we've assembled for SunMed Labs has and will continue to set a new standard for high quality concentrates in Maryland. SunMed's product offering includes everything under the sun from sugars to shatters to batters to cartridges – in both live and cured resin.

TEAM SPOTLIGHT

Meet Andy!

Andy has been with SunMed since April 2021. He's had the opportunity to work on the de-leafing team, the harvest team, and is now one of dedicated members of SunMed's Mother Plant room. He says the "mom room" is the heart of our greenhouse.

We asked Andy about the lessons he's learned along the way working in the greenhouse, to which he responded - patience is key.

“Knowing when to sacrifice speed for accuracy is so important. People underestimate the need for a positive environment that our plants can grow and thrive in. Our plants need and deserve just as many positive affirmations as children do to grow strong and healthy.”

Like many of us here, Andy believes the future of SunMed is now.

“I took this job because I am passionate about helping people with the best medicine on the market and SunMed has been doing just that.”

TEAM SPOTLIGHT

Meet Chrissy!

Chrissy has been with SunMed since February 2021. She began in the greenhouse where she worked on the harvest team and just recently transitioned to the lab as one of the first SunMed Labs team members. Chrissy says she is always up for a challenge and appreciates always learning new things, which is why this opportunity felt perfect for her.

“I've dedicated a lot of time learning how to properly care for our plants. Today, my focus is on understanding the science and practice of extraction to help make our batters, sugars, and shatters.”

Chrissy is responsible for weighing and packaging products in the lab. She's excited about the future of SunMed and all that is yet to come.

COLORING THE WAY:

SunMed: Packaging Guide

SunMed Cannabis Strain Colors

SATIVA

A **red** label indicates a Sativa strain, commonly associated with energy.

INDICA

A **purple** label indicates an Indica strain, commonly associated with relaxation.

HYBRID

A **green** label indicates a hybrid strain, usually a cross of both Sativa and Indica strains, commonly associate with a more balanced experience.
